**A**t Deines Manufacturing our company goal is simple and effective. We strive to produce the finest commercial lawnmowers on the market. And we believe we're succeeding. We start by using only the finest quality raw materials in our manufacturing process. Materials such as long life tooled steel spindle shafts, durable ductile steel spindle housings and full 11 gauge steel deck construction. These features are standard on every cutting deck Deines produces.

**W**e also believe that innovation is a key element in our success in the highly competitive commercial mower market. Since the creation of our company in 1970, we at Deines Manufacturing have consistently introduced new and exciting features to our entire line of commercial mowers. Ever since Deines first introduced the "Tilting Out-Front Deck," which allows the deck to tilt 90 degrees for easier maintenance, our engineers have continually developed innovative ideas to improve our entire product line. Innovations

like the electric deck lift on the 2000 series; dependable, self-cooling, self-contained hydrostatic transmissions; easily removable vacuum blower on the 40" and 50" decks, and our popular 8 bushel bag and 11 bushel dump box grass collection systems.

**A**t Deines Manufacturing, our commitment to be the best doesn't stop with production. We take great pride in our nationwide dealer network and continually offer factory training to dealer service technicians. Our factory staff is always prepared to help all our customers and dealers whenever the need arises.

**W**e at Deines Manufacturing are very demanding. We demand only the finest raw materials from our suppliers; we demand total commitment from our entire staff; and we demand to be nothing but the finest manufacturer of commercial mowers in the nation.
